www.DDC1975.ca

Responsibilities:

- Designed and deployed Websites for various companies and organizations.
- Presented designs and concepts to clients for review.
- Met and corresponded with clients (by in person, by e-mail correspondence or over VideoPhone/Webcam) to determine client's needs for their Website.
- Responsible for all aspects of project development from project scoping and estimating to storyboarding and final deployment.
- Perform the validation and testing of completed Websites.
- Updated and maintained client websites on an ongoing basis.
- Designed new Web interfaces, layouts, navigations, logos, animations, buttons, and icons.
- Implemented brand style guides to assure a consistent look and feel throughout divisional Websites.
- Worked concurrently on multiple projects while maintaining solid time management skills.
- Dedicated to learning through self-study and higher education.

2004-2006 Web Designer/Developer (Volunteer/Student)

Vancouver, B.C.

Attended BCIT for Web Technologies Program on-line and designed/deployed some websites on my volunteer time.

1997-2004 Insurance Corporation of British Columbia

Vancouver, B.C.

Responsibilities: Worked as Office Assistant for 7 years, using most of Microsoft Office Suite, and Session Managers. Duties included mail handling, filing, faxing, accounts payable, typing, and ordering office supplies and others.

1996-1997 Dataguard Management Ltd.

North Vancouver, B.C.

Responsibilities: Junior Programmer / Web Designer, worked with Microsoft Visual FoxPro and Visual Basics, assisted in the development of applications using these programs above. Created couple of websites for the company with earlier versions of Microsoft FrontPage and Macromedia Dreamweaver.

Additional Information

In my spare time, I enjoy playing ice/roller hockey, basketball, football, golfing, snowboarding and water sports, too. I also enjoy long walks with my dog, and do a lot of outdoor activities like going on camping trips, hiking, and fly fishing. My other hobbies include computers, surfing the Internet, reading Web Design magazines, video games, watching sports/television/movies and writing screenplays.
